

Offers IT a way to increase capacity or add capabilities without investing in new infrastructure, training new personnel, or licensing expensive software

Sybase Analytics Engine-based offerings enable the entire organization to proactively get the information that they need in a timely manner

Faster, more accurate answers can be the difference between success and failure!

Sybase Enabled Cloud Computing Business Intelligence Solutions

mLogica's Analytics on Demand Platform, **Powered by the Sybase Analytics Engine**, offers companies a way to increase capacity or add capabilities without investing in new infrastructure, training new personnel, or licensing expensive hardware or software.

These solutions ensure that end-users have the right tools to make the right decisions in a timely manner, with a desirable user experience. Analytics on Demand offers a delivery of services in a highly scalable and elastic fashion at lower costs, better performance and agility, turning complex business processes into simple services.

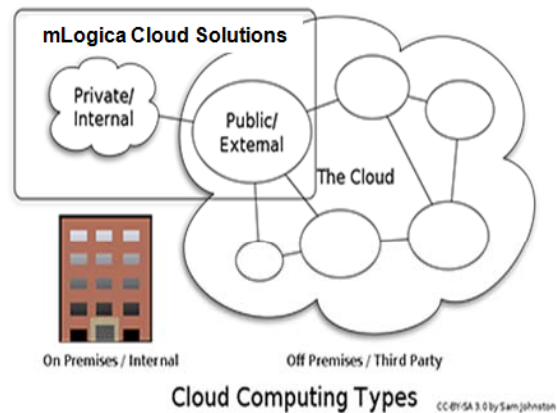

The "Software As The Service" model allows customers to utilize the platform in public or private cloud and pay used on uses.

Lower costs – a solution tailored to your workload without the need for capital investment in infrastructure and software – **Pricing as low as a few thousand dollars per month!**

Speed – a solution with ultra-high speed reporting and analytics. You will receive near real-time performance to execute critical business decisions.

Simplicity – a solution that enables deployment on demand, minimizing the impact on your IT department

Global Scalability – a solution that is easily scalable to 1,000s of users to match your global presence

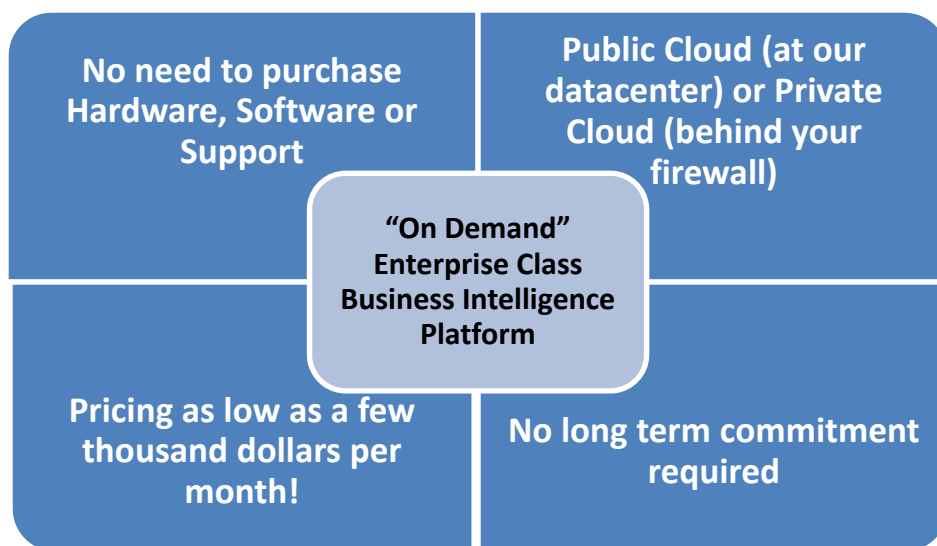

A complete Business Intelligence Platform, including:

- A specialized 'cloud' delivery mechanism. The option to host at your data center or our data center.
- Management and Application Deployment Console
- Ultra high performance, best of breed analytical engine from Sybase
- Extract-Transform-Load (ETL) Tool
- Dedicated or shared server(s) with horizontal/vertical scalability
- Advanced archiving with *Loss-less Compression* technology

- Analytics Accelerator** – Add as an extra node to your existing Enterprise Data Warehouse for data mining, advanced analytics or high performance ad-hoc queries
- Turn-key Analytics** – Direct connect to your OLTP Systems for high performance analytics, ad-hoc queries and drill down dashboards
- Departmental Data Mart or Enterprise Data Warehouse** – High performance enterprise class platform that allows you to build your own data mart or data warehouse from multiple data sources
- Advanced Analytics** – Available with over 150 modeling functions for data mining, financial and quantitative analysis
- Information Life Cycle Management** – Archiving and cross analytics for unstructured and multimedia data as well as transactional data

With the incorporation of Sybase’s Analytics Engine into our Analytics on Demand Solution, we provide an enterprise level, turnkey analytics solutions to large commercial enterprises and public sector organizations, as well as, mid-market businesses without any need for capital expenditures.

Delivery of services in a highly scalable and elastic fashion

- Ultra-high performance – enterprise class data warehouse engine
- Proven underlying technology with over 1,000 clients and certified for 1,000+ Terabytes of source (raw) data storage and retrieval
- Capacity on demand; increase or decrease depending on utilization
- Add users as needed, and only when needed
- Best of breed enterprise reporting and dashboards at your fingertips

Enterprise Class Public or Private Cloud Low Monthly Payments No Capital Expenditure
