mLogica Computech (India) Private Limited acquires MatchTek InfoTek Private Limited

Title: mLogica Computech (India) Private Limited acquires MatchTek InfoTek Private Limited

Released by: mLogica Computech (I) Pvt Ltd

Release Date: 2005-11-02 10:31:06

Summary: Aiming to create significant business opportunities in its niche consulting skills, mLogica Computech (India) Private Limited, announced the acquisition of MatchTek InfoTek Pvt Ltd., a staff augmentat

For Immediate Release:

This acquisition will see the integration of mLogica Computech's mobile/wireless, RFID application development and other technology services with Matchtek Infotek's Staffing Services specially related to Sybase technologies.

- Matchtek Offers a full range of staffing support services for its clients, to meet short-term staffing, contract-to-hire and full time employee needs.

"Matchtek specializes in recruitment and staffing of Sybase resources and expertise. Many of our technology solutions are based on Sybase technology. This acquisition will help us with the recruiting and staffing of Sybase expertise for our projects." said Mohan Sinha, Head of Business Development of mLogica Computech.

mLogica Computech is a Solution Integrator for Enterprise Software specializing in data management, software development services, mobile solutions, and selected process and technology outsourcing. mLogica Computech extends the reach of e-Business applications, enterprise data management, and Internet content to mobile and wireless devices, including Smart Phones, PDAs and laptops. We integrate remote sensing, RFID and wireless communications into an intelligent enterprise-class system.

Services:

- Remote Systems and Database Management Services

mLogica Computech's remote administration solution – mSecure, includes monitoring and call tracking applications, augmented by a team of Database Administrators and Systems Administrators. Additionally, mLogica Computech provide Database and Systems Performance and Tuning, Migration, Decision Support and Replication services.

- Enterprise Application Integration

mLogica Computech's enterprise integration practice offers numerous benefits. It allows companies to leverage best-of-breed software and develop cutting-edge solutions for market advantage/competitive advantage, while extending the life of their existing legacy systems and other existing information technology investments.

- Development and Engineering

Through its blended Global Implementation Models, mLogica Computech can augment the client's core development and/or engineering teams. This will not only lower development costs but will free up your senior resources for new development projects that will propel your business forward.

- **Technical Support**

Voice and email technical support - 24x7x365 Level One and Level Two support for your products and applications.

It is also interested in doing business with specialist firms in the areas of software development services, enterprise data management, RFID and supply chain application development.
