## **mLogica First to Provide Shared Hosting and Colocation for Sybase ASE Express for Linux Customers**

*mLogica announced today that it will be offering shared hosting services for ASE Express Edition for Linux by Sybase, Inc.*

/24-7PressRelease.com/ - February 2, 2005 - Irvine, CA, @ mLogica announced today that it will be offering shared hosting services for ASE Express Edition for Linux by Sybase, Inc. This newly announced Sybase ASE Edition is free of license fees for both development and production use. Sybase ASE has been vaunted as an industry strength database alternative to open source databases such as MySQL. mLogica will also be offering colocation services for both ASE Express Edition for Linux and ASE Enterprise Edition at mLogica's enterprise data center.

In addition to shared hosting and colocation services, mLogica provides customers with server management, full Web hosting, and site management. This offering completely manages clients' accounts by setting up email accounts, mailing lists, and adding users/FTP accounts - all with a user friendly web-based control panel and a Flexible Plan. The mLogica Data Center is located in Orange County, California. This 65,000 square foot building was designed from the ground up as a state-of-the-art data center with solid concrete construction, raised flooring and a seismically resilient architectural design. mLogica is offering a 24x7x365 "Follow the Sun" Remote Management and Support Infrastructure to support systems and databases. mLogica's mSecure provides true end-to-end security between wireless mobile devices and the corporate network.

Amit Okhandiar, President of mLogica Inc., said "Sybase ASE provides clients with a long term requirement for scalability, high performance, security and high availability. We are the first to provide Shared Hosting for Sybase ASE Express Edition for Linux ." With mLogica's shared hosting and colocation offerings, customers now have a variety of hosting options which, up until now, were not available to them. Okhandiar continued to say, "We are the first to address the customers' needs for hosting and colocation at an enterprise data center."

David Jacobson, Sybase's senior director of database and tools marketing, said "the company is quite pleased with mLogica's offering of shared hosting services for Sybase ASE Express Edition for Linux. With this offering we are looking forward towards providing customers to gain maximum competitive advantage by getting maximum value from their shared hosting services."

## ASE Express Shared Hosting and Colocation.

mLogica's shared hosting and colocation options provide ASE Express for Linux customers with choices that best suite their needs; customers can either utilize mLogica's servers or provide their own. With either option, the servers are installed at mLogica locations and include the following amenities:

- â€ Power Backup System
- â€ Building Automation System
- â€ Leak Detection System
- â€ Seismic Architecture
- â€ Physical Security
- â€ Fire Alarm / Suppression System

An unparalleled offering: shared hosting and colocation options, coupled with mLogica's server management, full Web hosting and site management.

## mSecure

mLogica's remote administration solution- mSecure, provides 24x7x365 "Follow-the-Sun" database and systems administration support. mSecure's offering also includes monitoring and call tracking; both of which are augmented by a team of Database Administrators and Systems Administrators. mSecure is a cost-effective and reliable approach, especially for companies with critical 24x7x365 requirements.

## Remote Support

- â€ Proactive Performance Monitoring
- â€ Proactive Maintenance Monitoring
- â€ Ongoing Performance tuning
- â€ Systems Planning and Architecture
- â€ Capacity Planning
- â€ Crisis Mitigation and Management (including onsite support if required)
- â€ Upgrade New Products/Releases
- â€ Emergency Bug Fixes
- â€ Security Patches
- â€ Technical Support
- â€ Backup and Restore services

## Electronic and Software Support

- â€ Technical Documents
- â€ Newsgroups
- â€ Electronic Case Management
- â€ Electronic Software Distribution
- â€ Email Notification
- â€ Call Tracking Application
- â€ Monitoring Software for your Database, Systems and Network
- â€ Dedicated US based telephone number for all support and/or maintenance calls
- â€ Enhancement Releases - As required
- â€ Maintenance Release - Priority Status

Personalized Support.

- â€ North America based Account Management
- â€ North America based Engagement Management
- â€ Review Meetings
- â€ Designated Support Engineer and Team
- â€ Resource available to be onsite if required

Whether you have your own data center, you colocate your systems or host your systems in-house, mSecure will provide you database and systems administration 7x24x365 at significant savings, regardless of whether you use your down data center or colocate!
